MAIN INDICATORS
OF THE DEVELOPMENT OF TOURISM
AND RECREATION IN THE REPUBLIC
OF UZBEKISTAN for 2022

The main indicators of the development of tourism and recreation in the Republic of Uzbekistan

Tourism has become an important sector in the structure of the international market for services, which ranked first in the world in terms of economic efficiency and left behind such significant industries as oil production and the automotive industry.

However, tourism is not only a strong tool for economic development. It is also an effective factor in creating the image of a particular territory, the achievements of the future and the promotion of its history. Undoubtedly, tourism has the greatest impact on the development of the country's economy. The tourist and recreational potential of certain states is a very complex concept for an unambiguous interpretation and assessment. This fact largely depends on the fact that the basis of the tourist potential are objects of cultural, natural, and historical heritage of each particular country, which are different in origin and essence. At the same time, external factors of a political, economic, legal, cultural, social and psychological nature have a significant impact on the final indicators of the level of attractiveness of a tourist destination. Today, the role of tourism around the world has steadily increased and this is due to the increase in its impact on people's lives and the economy of countries as a whole.

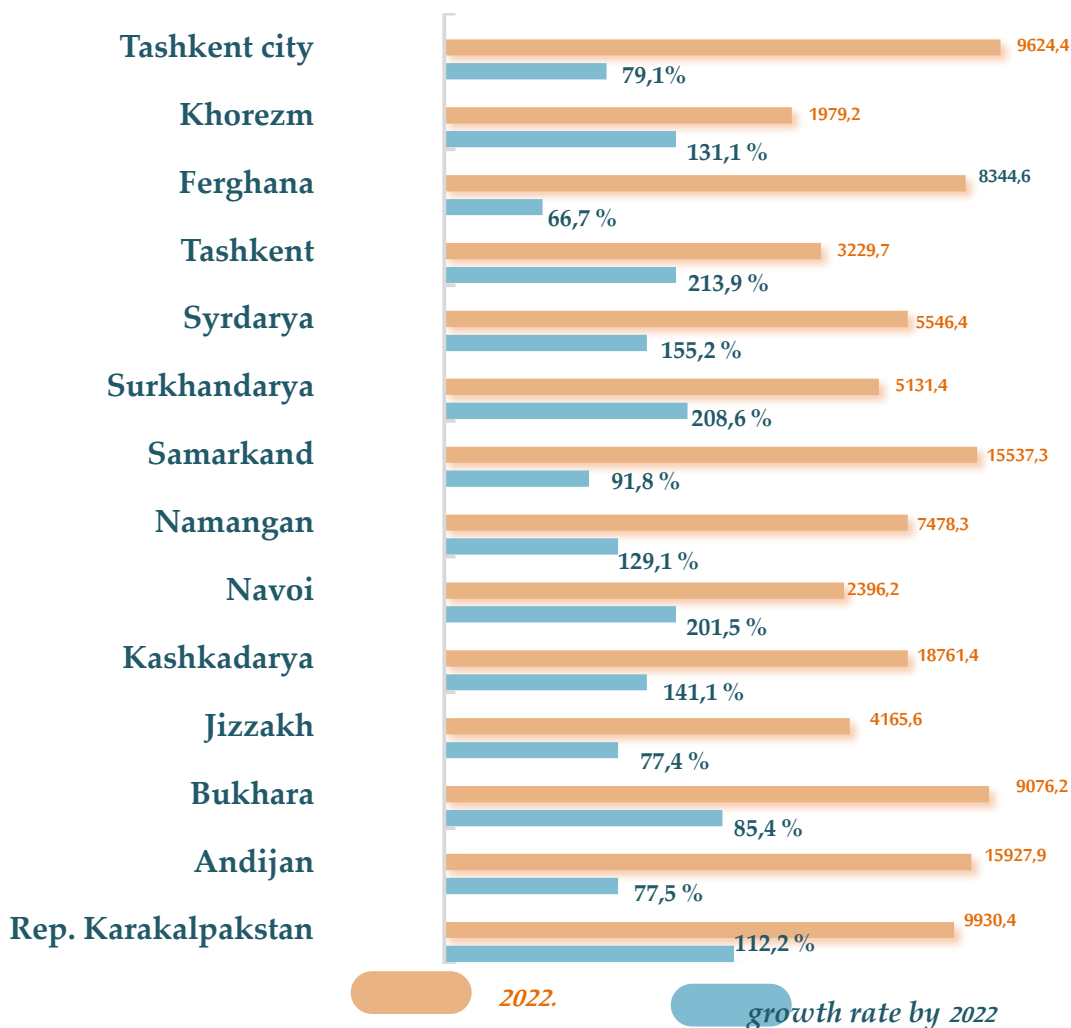

Most of the services in this area of activity are implemented with the least losses, tourism is increasingly affecting the world economy, which is becoming its hallmark, because it allows you to achieve the highest value added. Travel companies in today's market economy are increasingly aware of the importance and the need to develop new services and products.
