Construction work by type of enterprises

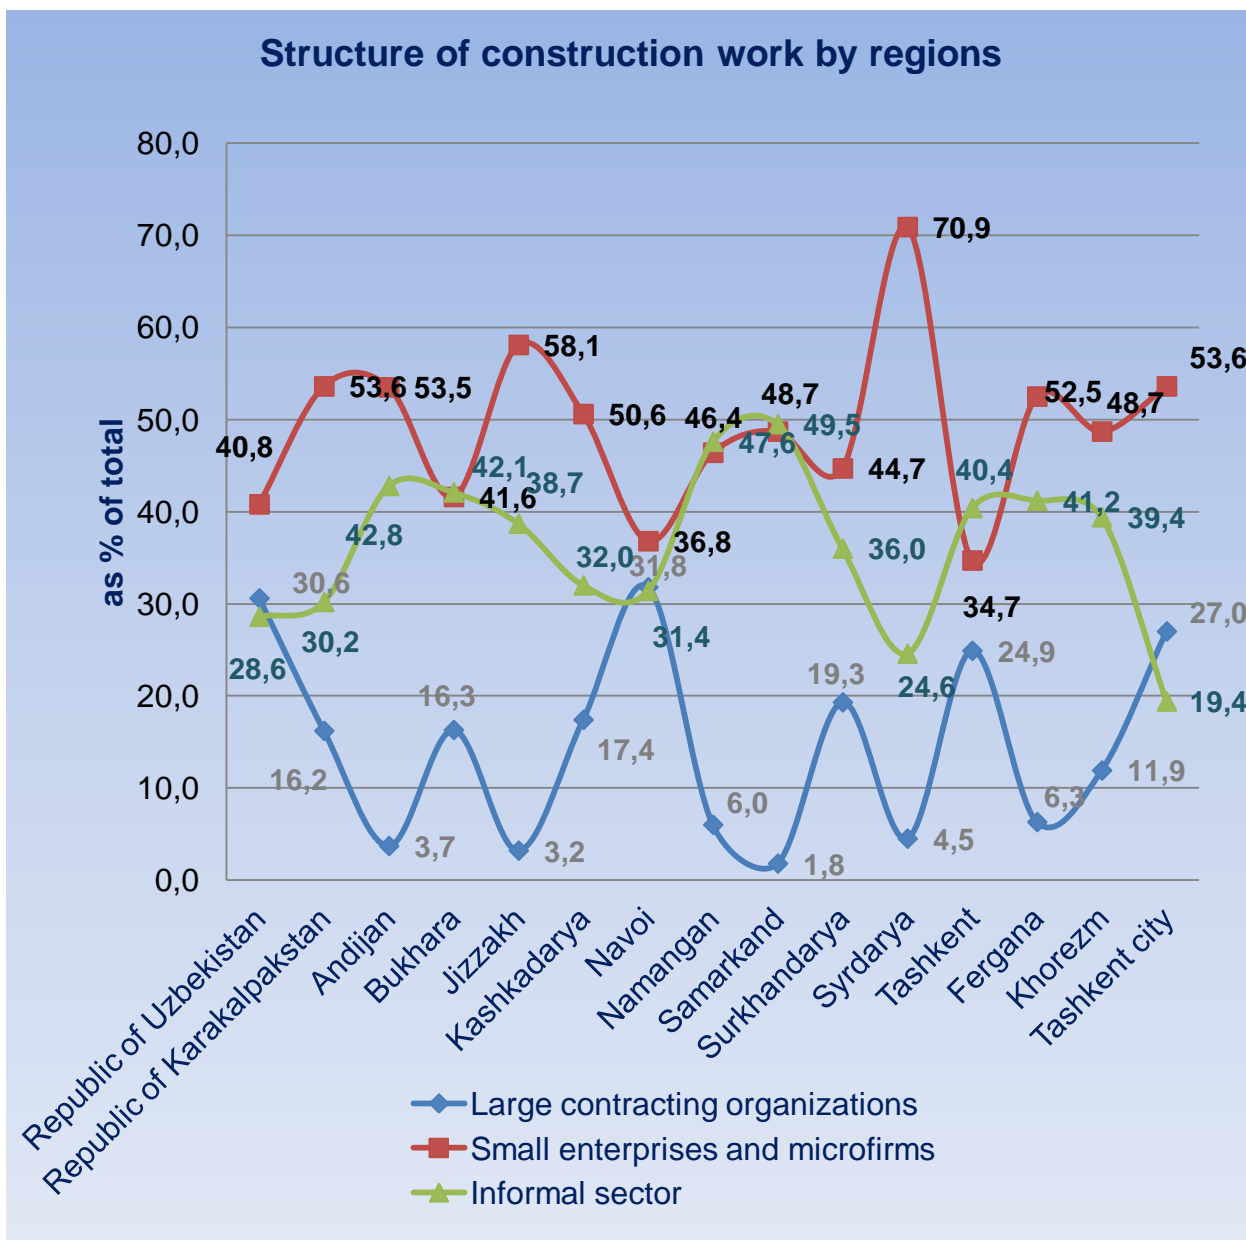

In the current period, most of the volume of construction work was carried out by small enterprises and microfirms. From their side, the share in the total volume of construction work amounted to 40.8%, and increased by 1.9% points compared with the corresponding period of the previous year. On the part of large construction organizations, the share in the total volume of construction work reached 30.6%, and decreased by 10.9% in comparison with the corresponding period of the previous year. The share of the informal sector in the volume of construction work amounted to 28.6%, and increased compared to the corresponding period of the previous year by 8.7% points.

Growth rates of construction work by type of enterprises

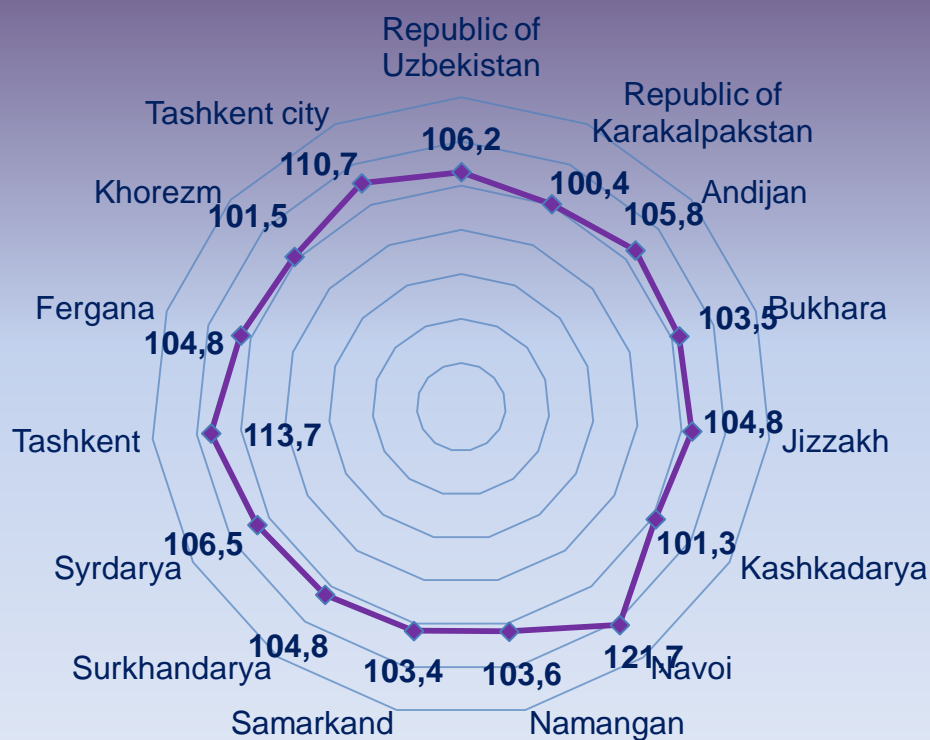

Navoi region leads in the regional structure of construction work carried out by large contractors. Major contractors in the region carried out 31.8% of the total volume of construction work, and compared with the same period of the previous year, this figure increased by 7.6%, respectively, in Tashkent, the figure was 26.9% and increased by 8.9% points.

The lowest share in the volume of construction work performed by large contracting organizations was recorded in the Samarkand region - 1.8%. The bulk of the construction work in this region fell to the share of the informal sector - 49.5% of the total construction work.

Growth rates of construction work by regions (as % of corresponding period of the previous year)

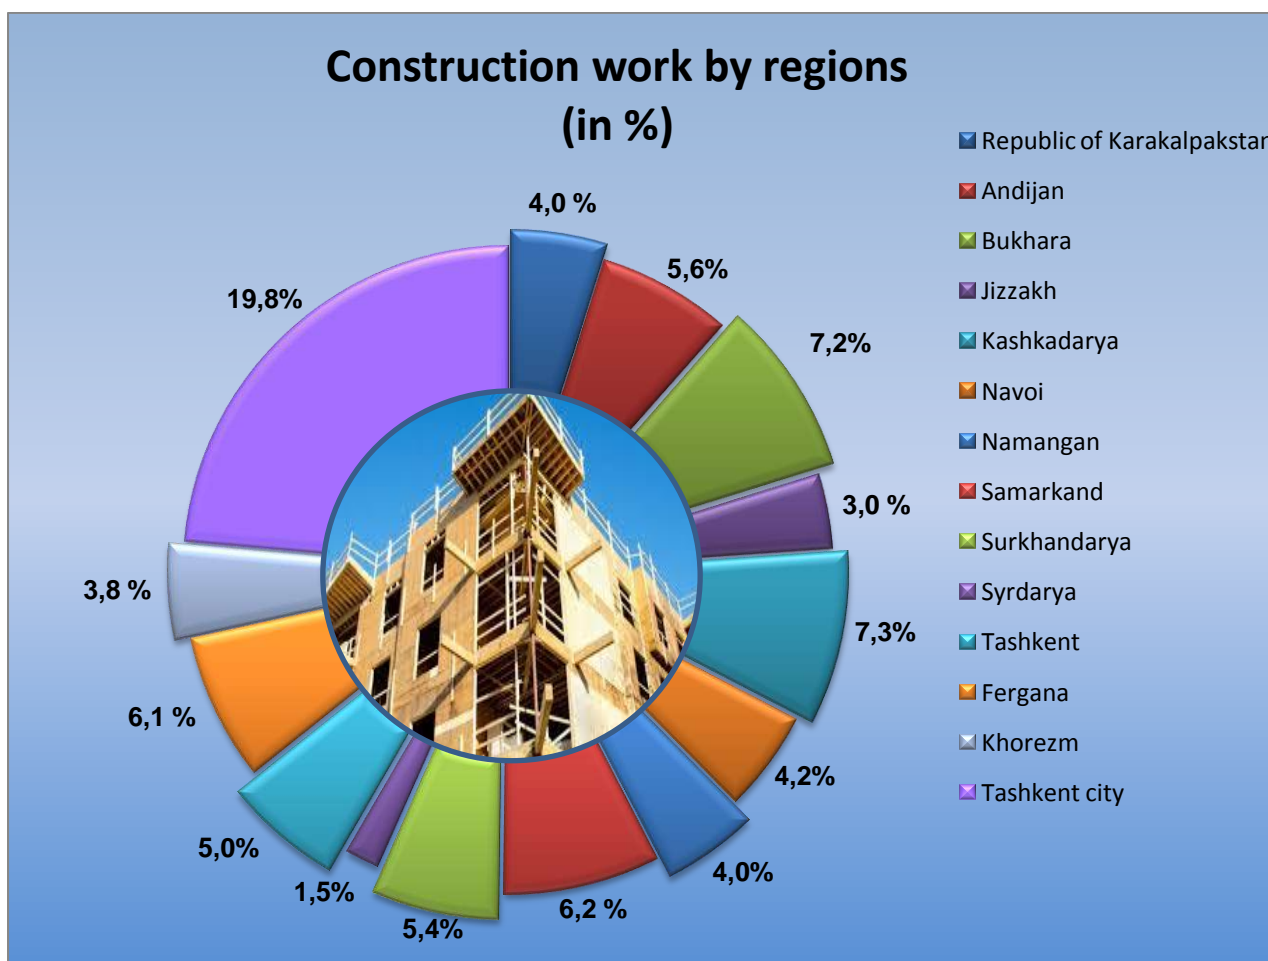

The highest growth rates of construction work were observed in the Navoi region. High growth rates (121.7%) were achieved here, due to:

- construction of a mine for the extraction and processing of gold-bearing ores from the deposits of the “Auminzo-Amantay” ore field (GMZ-5) (stages I-II);
- reconstruction of the third line of the pumping station “Amudaryo-Zarafshon”;
- Improvements in the extraction of gold from refractory ores from the “Kokpatas” and “Daugiztau” deposits.

The active construction of the following facilities ensured high growth rates in the Tashkent region (113,7 %) :

- construction of highways - UE “Avtomagistral”;
- construction of a new plant in the Navoi region - Subsidiary enterprise “Element-Qurilish”;
- construction of “Qodiriya GES”, as well as a military camp – “Chorbog’gesqurilish” UE.

- In Tashkent, high growth rates (110.7%) were achieved due to:
- construction of the “Yunusabad” and “Sergeli” metro lines;
 - construction of hydropower plants in the Pskent district;
 - construction of an overhead metro line in the city of Tashkent;
 - reconstruction of the National park under the park of the Union of writers of the Republic of Uzbekistan.
